

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Raiffeisen fond dluhopisových příležitostí, otevřený podílový fond, Raiffeisen investiční společnost a.s (hereinafter the “Fund”)

ISIN: CZ0008473998

The fund represents a standard fund.

The Investment Company that manages the Fund (the Management Company):

Raiffeisen investiční společnost a.s., Registered Number (IČ): 29146739 (hereinafter also the “Company”).

OBJECTIVES AND INVESTMENT POLICY

The Fund’s aim is to achieve a yield by investing its assets mostly in debt securities, i.e. government, corporate and financial institution bonds, including the placement of a smaller part of the portfolio in foreign currency bonds or bonds issued by issuers with a lesser financial standing (credit rating). No less than 65 % of the Fund’s assets will be invested in securities with a rating of no less than BBB-/Baa3 and higher. The weighted average maturity of the Fund’s portfolio will not exceed five years. The Fund is construed as a bond fund.

The Fund does not concentrate on any specific industrial branch, sector or region. The performance of the Fund is measured in CZK. The Fund represents a capitalisation fund.

The Fund is actively managed within the approved investment strategy and does not intend to copy or follow any specific index or benchmark. More detailed information is available in Chapter 8 of the Fund Prospectus.

Fund units are issued and redeemed usually on each business day for the current value set in accordance with the Fund Prospectus. Further information about unit issues and redemption is specified in Chapter 12 of the Fund Prospectus.

Recommendation: The Fund may not be suitable for investors planning to recover their invested pecuniary funds within a term shorter than five years.

RISK AND REWARD PROFILE

← Potentially lower reward			Potentially higher reward →			
← Lower risk			Higher risk →			
1	2	3	4	5	6	7

The Fund is placed in Risk Group 4.

The Synthetic indicator 1 to 7 takes into account the fluctuation of the value of the units and shows the potential reward of investments in relation to the degree of risks inherent in the Fund. The higher the number, the higher the potential reward but the less foreseeable the reward, and investors could therefore suffer a loss. However, even the lowest number does not mean that an investment is entirely free of any risk; it rather indicates that in comparison to higher numbers the investment offers a lower but more foreseeable reward.

The indicator value was determined based on historical information, which is not always a reliable guide when it comes to the future risk profile of the Fund. The risk and

reward indicator is regularly re-assessed and its value can fluctuate up and down.

The risks an investor undertakes when investing in this Fund are linked in particular to non-compliance with obligations by issuers of bonds or money market instruments, or a reduction in the trustworthiness of such issuers, or a change to the overall interest rate environment. The liquidity risk, i.e. the possibility of it being difficult to sell financial assets, can also influence the value of a unit of the Fund.

The value of investments can rise and fall. No return on such investments is guaranteed. More detailed information is available in Chapter 9 of the Fund Prospectus.
