

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Raiffeisen fond dluhopisové stability, otevřený podílový fond, Raiffeisen investiční společnost a.s. (hereinafter the "Fund")

ISIN: CZ0008474293

The Fund represents a standard fund.

The Investment Company that manages the Fund (the Management Company): Raiffeisen investiční společnost a.s.,
Registered Number: 29146739 (hereinafter also the "Company").

OBJECTIVES AND INVESTMENT POLICY

The Fund is a bond investment fund. The object of the Fund is to achieve regular yields by way of investments primarily in bonds, money-market instruments, and bond funds denominated in CZK and issued – inter alia – by governments, supranational institutions or entities with high credit ratings. To a smaller extent, portions of the assets may be invested in some selected foreign currencies. It is within this strategy that the Fund may invest in financial derivatives potentially serving currency hedging. Up to 100 % of the net asset value of the Fund can be invested in investment securities and financial market instruments which were issued or which are guaranteed by the Czech Republic. Specific criteria of social responsible investing (ESG criteria) are not taken into consideration within the investment strategy of the fund. More detailed information is available in Chapter 8 of the Fund Prospectus. The Fund represents a capitalisation fund.

The performance of the Fund is measured in CZK. The Fund is managed actively and does not copy or follow any specific index or indicator.

The Company cannot guarantee the achievement of the investment aim and no third party guarantees for protection of the investors are provided.

Fund units are issued and redeemed usually on each business day for the current value set in accordance with the Fund Prospectus. Further information about unit issues and redemption is specified in Chapter 13 of the Fund Prospectus.

Recommendation: The Fund may not be suitable for investors planning to recover their invested pecuniary funds within a term shorter than two years.

RISK AND REWARD PROFILE

Potentially lower reward ← Lower risk			Potentially higher reward → Higher risk →			
1	2	3	4	5	6	7

The Fund is placed in Risk Group 2.

The Synthetic Indicator 1 to 7 takes into account the fluctuation of the value of the units and shows the potential reward of investments in relation to the degree of risks inherent in the Fund. The higher the number, the higher the potential reward but the less foreseeable the reward, and investors could therefore suffer a loss. However, even the lowest number does not mean that an investment is entirely free of any risk; it rather indicates that in comparison to higher numbers the investment offers a lower but more foreseeable reward.

The indicator value was determined based on historical information, which is not always a reliable guide when it comes

to the future risk profile of the Fund. The risk and reward indicator is regularly re-assessed and its value can fluctuate up and down.

A typical investor should be aware of the risks associated with investments in bonds, money market instruments and other instruments bearing the risk of bonds (including but not limited to credit, interest, foreign-exchange and concentration risk) and should be prepared to accept the risk of possible loss resulting from the investment.

The value of investments can rise and fall. No return on such investments is guaranteed. More detailed information is available in Chapter 9 of the Fund Prospectus.
